

## User Group Clinics

Clinics have a guest speaker who presents on a specific topic. Sessions are recorded, and a video timeline is produced for each recording, enabling future viewers to know approximately where to jump to in order to review a specific subject. It is strongly recommended that you download and print out the timeline to make the most efficient use of your time viewing the video.

Please click on the topic to see the video for each session. Please click on Yes to see/download the Timeline.
